Application/Control Number: 09/989,350

Art Unit: 1646

Claim 13 is pending in the instant application.

Claim 13 are objected to as reciting an improper Markush Group. M.P.E.P. 803.02 states that:

"Since the decisions in In re Weber **,198 USPQ 328 (CCPA 1978); and In re Haas, 198 USPQ 334 (CCPA 1978), it is improper for the Office to refuse to examine that which applicants regard as their invention, unless the subject matter in a claim lacks unity of invention, In re Harnish, 631 F.2d 716, 206 USPQ 300 (CCPA 1980); Ex Parte Hozumi, 3 USPQ2d 1059 (Bd. Pat. App. & Int. 1984). Broadly, unity of invention exists where compounds included within a Markush group (1) share a common utility and (2) share a substantial structural feature disclosed as being essential to that utility."

The nine different amino acid sequences recited in claim 9 do not appear to share a

Restriction to one of the following inventions is required under 35 U.S.C. 121:

common utility that is based upon a shared structural feature lacking from the prior art.

- I. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:2, classified in class 530, subclass 388.22.
- II. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:4, classified in class 530, subclass 388.22.
- III. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:6, classified in class 530, subclass 388.22.

Application/Control Number: 09/989,350

Art Unit: 1646

IV. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:8, classified in class 530, subclass 388.22.

- V. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:10, classified in class 530, subclass 388.22.
- VI. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:12, classified in class 530, subclass 388.22.
- VII. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:14, classified in class 530, subclass 388.22.
- VIII. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:16, classified in class 530, subclass 388.22.
- IX. Claim 13, in so far as it is drawn to an antibody which binds to a polypeptide having the amino acid sequence of SEQ ID NO:18, classified in class 530, subclass 388.22.

The inventions are distinct, each from the other because:

Inventions I to IX are nine distinct chemical compounds each of which can be made and used without the others. They lack unity of invention because they do

not share a common utility that is based upon a shared structural feature lacking from the prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Ulm whose telephone number is (703) 308-4008. The examiner can normally be reached on Monday through Friday from 9:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached at (703) 308-6564.

Official papers filed by fax should be directed to (703) 308-4242 or (703) 872-9306. Official responses under 37 C.F.R. § 1.116 should be directed to (703) 872-9307.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
